

Precisely Simple

Why **ALPHAGAZ**™ ?

The benefits are clear

Simpler choices

ALPHAGAZ™ is, hands down, the simplest way to buy high quality, reliable analytical gases. By providing you with a straightforward, less time-consuming way to choose analytical gases, we make sure you have more time to be more productive elsewhere. Even our packaging is simplified: all our pure gases cylinders have our **SMARTOP**™ as standard, the simplest, clever valve on the market.

Consistent, reliable service

We pride ourselves on our customer-centric service. We know that having the right product at the right time is key. That is why we are committed to guaranteeing a short and reliable lead time so you have your order when you expect it.

As an **ALPHAGAZ**™ customer, you have a dedicated network of specialty gases experts supporting you all along the way. We make sure you have a constant point of contact from quotation, to help you identify the best product for your specific application, to delivery.

Quality you can depend on

When it comes to analytical gases, precision makes the difference. **ALPHAGAZ**™ offers irrefutable accuracy and traceability, guaranteed by top certificates and accreditations (all Air Liquide laboratories are ISO-9001 compliant and many accredited according to ISO 17025 globally). To achieve this, we carefully trace impurities and control mixtures' stability and quality initially and over time.

You can rely on the uniformity of our range worldwide. As part of our consistency promise, we ensure reliable repeatability and proven stability for our products in all your locations.

Air Liquide's Industrial Merchant Business Line delivers industrial gases and innovative solutions, including application technologies, equipment and services. From independent professionals to large industrial companies, our 33,500 employees serve over 2 million customers daily across 75 countries. They use their unmatched business and technical capabilities to develop gas solutions that boost the performance of industries and help them to increase product quality, unlock greater competitiveness and minimize the environmental footprint of their manufacturing processes.
